The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claims 1,3-6,8 and 18 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lillienfeld et al in combination with Baliga et al, Cox et al and Chen et al.

The rejection is maintained as stated in the paper mailed 7/8/03.

In response to applicant's arguments against the references individually, one cannot show nonobviousness by attacking references individually where the rejections are based on combinations of references. See *In re Keller*, 642 F.2d 413, 208 USPQ 871 (CCPA 1981); *In re Merck & Co.*, 800 F.2d 1091, 231 USPQ 375 (Fed. Cir. 1986). It is not necessary for Chen to disclose forming an edge termination layer. Baliga et al is relied on as containing such a disclosure.

Applicant argues there is no motivation to combine the teachings of Chen et al with those of the combination. However, art recognized suitability for an intended purpose has been recognized as motivation to combine. MPEP 2144.07.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Lillienfeld et al in combination with Baliga et al, Cox et al and Chen et al as applied to claims 1,3-6,8 and 18 above, and further in view of Thero et al.

Thero et al is applied as stated in the paper mailed 7/8/03.
